THE GREATEST INVENTION OF THE AGE. West's Patent Galvanic Cement For Roofing.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fre and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people with. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they become usele a, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumby, and worthless; whereas, the inventor of the Galvenic Cement, has labored twenty years to combine articles to obviate those difficulties, and can testify from his long experience, and nu nerous te timonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best attoler ever before known. The combination of this Ce pent is such that it is calculated for entire new roofs, flat or steep, covering over old shingles without removing them; lining eave-thoughs, seaming around barlements, chinneys and sky-lights. Covering car-tops, steamer-decks, ac. This Cement, by its non-conduction and galvani-m, prevents metal roofs from rusting and unsoldering, and resists the extremes of heat and cold, better than any thing ever invented, for entire roofs or for covering metal and the out side of wood hu ldings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of rennessee, will sell rights of Territory, by Counties or

of Roofing. The subscriber has and his mode of Roofing tested as o its qualities, during the last year and a haif in the city of Memphis, which has proved satis actory, to which a number of the nost prominent citizens can

testify.

Bennett covered two roof fir me last spring, with a composition called West's Patent Galvanic Cement one of then was a new deck, he other an old shingle roof, which are giving perfect satisfaction. He also repaired a dor-mer window, which leaked badly, and had ballled the skill of Carpeniers to prevent its leaking, which he succeeded in maying perfectly tight. I do most cheerfully recommend his more of roofing to the public, for all roofing turposes, and believe it to be a permanent fixture against fire and water.

Proprietor Commercial Hotel. EUPERINTENDENT'S OFFICE, MEMPRIS & ORIO R. R. MR BENNETT,- Dear Sir:-Our company having b roubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge extends, I can cheerfully recommend it to any who wish a Yours, &c ...

H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

To THE PULLIC.—W. S. Bernett, made a plication to us last summer to cover our buildings with West's Galvanic Cement; it being a new thing, we thought we would try it; had it applied to our Blacksmith Shop, and Engine House, attached to the Fo mary. They have proved all required of a water proof roof, having withstood some of the great est storms, and are giving good satisfaction. We can only add, try it and you will be satisfied.

CURTIS & KNAPP, Iron Founders.

Meurus, Jan. 14, 1957 Time. Bennett, has done some small amount of roofing for me in his peculiar way, with Cotton stuf, coated with a preparation the basis of which appears to be a Coal Tar. It is a very effectual and light roof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the sug in summer; nor does it harden and crack from the influence in the cold of winter.

#### PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING,

THE undersigned is prepared to introduce into use in Tennessee W. E. CHILDS & OO.'S PATENT ZLAS-FIC PIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Com-panies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fall to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth sur-face that will resist the action of the atmosphere in every chimate. It is impervious to water, elastic, and flexible. It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resistany ordinary external exposure to fire, as is shundarily any ordinary external exposure to are, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing, old shingles, tar and gravel, tin, tine, copper, or iron roofs—it making no difference how steep or flat they may be—for seven dollars per one hundred square feet; it being far theaper than any Roof of the old style, and we are sure it will either better satisfaction.

cheaper than any Roof of the oid style, and we are sure it will give better satisfaction.

It will also be found to be the best thing ever invented to lover or mend old leaky tin, tarand gravelroofs, or around thinneys, acuttles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. The Roofs can be painted over (and warranted not to leak) at two deliars and fifty cents per hundred square feet, which is cheaper and much better than paint. This Roofs will be found to be the best theng for covering large Roofs where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges, Depots, Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a foint in it, it presents no chance for fire to communicate, and any ight substance will burn out without ignifing.

Insurance Offices at Cincinnati, and other places where Childs & Oo.'s Cement has been used, insure Buildings with Roofs covered with iron, Copper or Tin.

The Cement will be furnished to those at a distance with directions for using.

fatherland scattered here and there over the face of this mighty country. Meeting with great success arong them, I now offer it to the Amedican public, knowing that its truly wonderful medicinal virtues must be acknowledged. It is particularly recommended to those persons whose constitutions may have been impaired by the continuous use of ardent spirits, or other forms of dissipation. Generally instantaneous in effect, it finds its way directly to the seat of life, thrilling and quickwning every nerve, raising up the drooping spirit, and, in fact, infusing new health and vigor in the system.

NOTICE.—Whoever expects to find this a beverage will be disappointed; but to the sick, the weak and low spirited it will prove a grateful aromatic cordial, possessed of all agular remedial properties. CAUTION. The great popularity of this deligh fall aroma has induced many imitations, which the public should guard against purchasing.
